CITY OF RIVERTON NOTICE OF PUBLIC HEARING ON THE WATER RATE SCHEDULE

The city council will hold a public hearing on the proposed water and sewer rate schedule for the coming fiscal year. The hearing is open to every resident and to any person who pays a water bill inside the city limits.

The proposed schedule raises the base monthly charge and lowers the per gallon charge above the first four thousand gallons. A household using less than four thousand gallons a month will pay more under the proposal than it pays now.

Written comments may be filed with the city clerk until five in the afternoon on the last business day before the hearing. Comments filed after that time are entered into the record but are not read aloud.

The hearing takes place in the council chamber on the second floor of city hall. The building has a ramp at the rear entrance and an elevator to the second floor.

A sign language interpreter and a Spanish language interpreter are provided at no cost if the clerk is asked at least five business days in advance. Assistive listening receivers are kept at the desk.

The full rate study, the current schedule, and the proposed schedule are available for inspection at the clerk counter during business hours and are posted on the city notice board in the lobby.
